## Education

### University of California, San Diego / Computer Science

September 2021 - June 2025

- GPA: 3.813
- Classes: CSE 12 (Data Structures), CSE 15L (Software Techniques), CSE 30 (Systems)
- Organizations: Students Who Engage, Learn & Lead (SWELL)

## Experience

### First Republic Bank / Software Intern

June 2022 - August 2022, Remote

- Automated system for user provisioning using Python on the Snowflake platform, saving hours of engineering time each month dedicated to manual provisioning.
- Built a React-Flask app utilizing SnowSQL to show users existing roles on the Snowflake platform, significantly lowering the number of requests for new roles.
- Automated baseline rule verification on Snowflake, saving the lead engineer an hour quarterly.

### Gordian Software / Software Intern

June 2021 - August 2021, Remote

- Designed and implemented 4 command-line interfaces using Python to get data from different airline APIs, and transformed that data from XML to JSON using lxml.etree and jsonify.
- Analyzed airline-specific price irregularities and developed a library using Python to correct them, resulting in prices accurate down to the nearest half-dollar.
- Developed an automated testing suite with Pytest to aid in TDD for the rewriting of an internal library, reducing the rewriting time by nearly a week.

### Google Mentorship Program / Full Stack Developer

December 2019 - June 2020, New York, NY

- Managed the codebase using Github to facilitate collaboration and to follow the software development life-cycle.
- Created Flask backend that scrapes car-dealing websites for car data and places it into a SQLite database.
- Utilized a React frontend to dynamically rank and display cars on the market using user-selected parameters.

### The Stuyvesant Spectator / Lead Full Stack Developer

January 2019 - January 2021, New York, NY

- Facilitated the addition of new author/illustrator profiles in the CMS by creating a new Ruby API endpoint and building a React frontend to take inputs.
- Redesigned search bar to load faster and decluttered footer on the main website using React.
- Monitored the server hosted on AWS and limited server downtime to less than an hour a month.

## Certifications

AWS Certified Cloud Practitioner: August 2022 - August 2025

## Skills

### Languages:

Proficient: Python, Javascript  
Familiar: C, Java

### Software Development:

Proficient: Git, Flask, Pytest, React.js, REST APIs, Linux/Unix, AWS  
Familiar: Node.js
